DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26 and 51-52, drawn to a compound of the claimed formula and method of making, classified in class 528, subclass 425.
- II. Claims 27-40 and 53-54, drawn to another compound of the claimed formula and method of making, classified in class 528, subclass 271.
- III. Claims 41-50 and 55-56, drawn to a different compound and method of making, classified in class 528, subclass 361.
- IV. Claims 57-61, drawn to a conjugate of the claimed formula, classified in class 514, subclass 25.
- V. Claims 62-67, drawn to another conjugate of the claimed formula, classified in class 514, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and (II or III) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants to form different products having different formulas.

Inventions IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants to form different products having different formulas.

Inventions I and (IV or V) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants to form different products having different formulas.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III or IV or V, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
